<https://warpedpuppy.com>

Software developer & educator with extensive professional experience in: 1) the design, development and maintenance of web sites, games, and applications; and 2) teaching web dev to beginning-through-advanced students.

Notable experience includes:

- Developed the front-end of a website with traffic of 20 million monthly pageviews.
- Coded in a boiler-room web game development environment, writing strong code quickly.
- Created curriculum and taught webinars on web development for coding academy.
- Mentor for Full-Stack development students.
- Coded and Maintained subscription based ecommerce sites in ReactJS and VueJS.
- Ranked ‘Expert’ in JavaScript at CoderByte.
- Currently creating educational site about programming animation.

Professional Experience:

Software Engineer, Warped Puppy LLC, 2004 - 2024

- Worked with many different organizations including the SEIU (Washington D.C.), Atlantis Technology (Boston), CleverTech (Boston), The Dodo (New York), Starfall Education (Boulder).
- Focused primarily on coding front-ends for complex applications, but have regularly contributed to back-ends as well.
- Focused on React, but significant experience in Angular and Vue as well.
- Significant and long-term experience in CSS and SASS.
- Have dealt with many, many apis that are crucial to the modern web stack: Auth0, MailChimp, Stripe, Wordpress, Shopify, and others. Extremely comfortable learning new ones.
- Coded and maintained subscription-based, ecommerce sites.
- Collaborated and managed international teams, including teams in Russia and Eastern Europe.
- Coded and implemented Google Analytics A/B experiments, which required creating alternate versions of the site and managed their application via lazy loaded JavaScript.
- Programmed educational games and contributed to educational game app that was, at one point, the #1 educational game app in the world.

Mentor & Curriculum Developer, 2017-2024

- Mentored and wrote curriculum for CareerFoundry and mentored for Thinkful.
- Created >20 videos for use in the CareerFoundry web dev curriculum.
- Conducted multiple video seminars for groups of students.
- One-on-one mentoring in full-stack programming including ReactJS, NodeJS and AWS.
- Taught JavaScript from fundamentals to advanced.
- Managed Student forum.
- Assisted students in app creation, both front-end and back-end.

Education:

Various Coding Certificates

AcademyX, San Francisco, CA

Two years of professional trade school.

Juris Doctor (J.D.)

University of California, Hastings College of the Law

Passed both the California and Connecticut bars. Awarded an HPILF grant.

Bachelor of Arts (B.A.)

University of California, Berkeley

Majored in History, Graduated with Honors.
